

Argos OnBoard for Océ

Accurate and Easy Print, Copy, and Scan Tracking

Argos OnBoard tracks printing, copying, and scanning right from the panel of your Océ large format printer. With As-Printed Tracking, Argos works with or without a print server—even in a serverless cloud environment for ultimate flexibility. Tracking that works around your print workflows instead of interrupting them.

Keep Your Workflow

Argos adapts to how you print rather than forcing your users to a specific process. Argos works with or without print servers, in the Cloud or on-premise, and is compatible with tools like Océ Direct Print, Onyx, AutoCAD, Revit, and more.

Lock Down Your Océ

Argos OnBoard for Océ syncs your active user list with your Océ controller so every user in your office is required to log in before making copies, scans, or reprints directly from the panel.

Requirements

- Compatible Kyocera HyPAS-enabled MFP
- Kyocera Card Authentication kit (if using Proximity card reader)
